Subject: RE: Regional data review request

I have at least glanced at the majority of the reports we've received as hard copies or electronically via email, as many companies sent in reports directly in addition to reporting via CEDRI. Many of these I recognize in the list. I am off tomorrow, but I will start looking through the list next week. I have the report copies we received as pdfs in folders by state on our network drive for FOIA 001886, and I can quickly glance at if I'm not sure. As I mentioned, some reports will include both well sites AND compressor stations or gas plants. I will use a different color for combined reports as opposed to just production sites only. Diana

The first file is the first set of reports thru I believe January of 2018 (when we did the prior FOIA). The file I asked you to look at is ALL reports since the first annual report was due.

So yes, the highlighted one is the one I want you to look at. At your earliest convenience. I know you are out next week with our friends in NM. R8 did theirs already so we can start with theirs while you work on yours. Thanks.

Hi Marcia - when is a reply needed? I took a quick look, and the second file on the SharePoint had several tabs for Region6(each state) that already broken down type of sites by Reporter...the first file is the one you want us to look at, yes? The second file has counts of well site facilities...?

Hi Cindy and Diana,

Rob suggested that you two are best suited to help the Oil and Gas Technical reconsideration workgroup do some "culling" of the electronic compliance reports. We are hoping to glean some information regarding fugitive emissions from them. Amy Hambrick might need to give you permission to access the sharepoint site.

Ex. 5 Deliberative Process (DP)

You will find a download of the submitted 0000a reports to CEDRI. Please highlight the ones in your region that look like well sites. This will help cull the list and we can then create a smaller list of reports which we need to download to further scope.

In the file on sharepoint there is also one well site report so you have an idea of what it looks like - there are tabs for each type of affected facility.

Ex. 5 Deliberative Process (DP)

Thanks in advance!

Subject: Regional data review request

On today's call, you mentioned asking the regions to review a spreadsheet and cite the well sites. Have you asked Cindy Kaleri or Diana Lundelius to do that review? I can't locate the request in my email and they would be the more informed individuals to provide the information.
